responsibilities in drug therapy. Sample drug labels familiarize you with the labels you will encounter in clinical practice. A basic math review appendix provides a helpful review of key mathematics concepts. Answers for all exercises are included to facilitate self-study. Thoroughly updated content corresponds to the Kee text, including a new chapter on medication safety. Additional NCLEX® examination-style review questions reflect an increased focus on alternate item-format questions. Approximately 100 new prioritization activities provide practice in identifying key nursing actions.

ICD-9-CM Inpatient Coding Reference and Study Guide Ba Rhit Ccs Linda Kobayashi 2010-07 If you need to have a strong understanding of how ICD-9-CM diagnosis and procedure codes are determined, then you have chosen the right book, ICD-9-CM Inpatient Coding Reference and Study Guide. The author designed a book that goes beyond the fundamentals, that gets into the details of ICD-9-CM diagnosis and procedure code assignment as would be experienced on the job. This user-friendly reference teaches coders how to handle many coding situations, while also being comprehensive enough to teach someone with a basic knowledge of medical coding how to move to the next level of advanced inpatient coding. Updated every year to reflect the annual ICD-9-CM coding changes, the text enables HIM professionals to master the concepts of medical coding while also gaining critical knowledge to pass the CCS exam administered by AHIMA and the CPC-H exam from the AAPC. The book also serves as an excellent desk reference and resource for coders who need to refresh their ICD-9-CM coding skills. Among the topics covered in Volume 1 are inpatient coding guidelines, coding conventions, coding tables, and a drug reference. However, the heart of this manual is the body system analysis, based on chapters 1 – 17 of the Tabular list in Volume I of the ICD-9-CM Official Coding Guidelines. The chapters are categorized by body system such as respiratory, digestive, et al. The chapters in this study guide follow the same sequence as the Official Coding Guidelines. All chapters, in addition to highlighting basic coding guidelines, contain situation-based coding tips and coding examples. A quiz follows each chapter reinforcing concepts in a rigorous manner that applies directly to the professional coding environment. The book also contains a selective discussion of invasive procedures that the coder will most likely encounter on the job and on the exam. At the end of ICD-9-CM Inpatient Coding Reference and Study Guide are 15 case studies, providing the reader with an opportunity to assess their ICD-9-CM coding skill set and speed at coding inpatient medical records. Each record contains a face sheet, history & physical, progress notes, and answer sheet. Some of the case studies contain ER reports, consultations, as well as operative and pathology reports. The answer key at the end of this study guide contains a rationale for all code assignments. 456 short answer questions 116 multiple choice questions 15 full medical record

case studies Each question is highly relevant and reflects a coding situation most hospital-based inpatient coders will face. The text strives to ensure the reader understands every diagnosis and procedure discussed: thorough discussion of symptoms, standard treatment protocols, and medications. Coding examples and quizzes help clarify the information presented. Linda Kobayashi, BA, RHIT, CCS, has been a coder and coding manager for almost 20 years. Since 1998, Ms. Kobayashi has owned and operated Codebusters, Inc., a nationwide coding consulting company. Widely regarded as a medical coding and auditing expert, she has conducted workshops on a variety of coding topics, including CCS Exam preparation workshops. Throughout her career the author has remained professionally active, as an AHIMA member as well as a member of her state association, CHIA (California health Information Association). Her formal training includes a teaching credential from California State University Los Angeles, a B.A. degree in English Literature from University of California Los Angeles, an RHIT from AHIMA after completing the RHIT program at East Los Angeles College, and a CCS certificate from AHIMA. Extensive experience as a hands-on coder, auditor and educator, and has given the author the expertise to help coders prepare for the professional coding environment.

Study Guide for 'Wolf Journal, a Novel' Sue Knopp 2005-12-01 This study guide is the academic companion to Brian Connolly's "Wolf Journal." Set in the Allegheny Mountains of northern Pennsylvania, farm boy Jimmy Warren finds wolf tracks in the snow - even though no wolves have been in these woods for a hundred years. The tracks lead him deeper into his passion for nature guided by Hawk, an old Susquehannock storyteller. Along the way, Jimmy falls in love with the beautiful Sherry Woolman who shares his love of the wild. As a school project, Jimmy keeps a journal on wolves. In order to protect the wolf he discovered, Jimmy writes about him as if he is fiction. The Tanner brothers, a derelict pair of would-be bounty hunters, threaten to destroy the perfect balance of nature that Jimmy has found. "Wolf Journal" is a journey into the natural world where intricate details, like the imprint of a wing in snow, tell a larger story - one of endangered species, an endangered planet, and the human spirit that strives to understand and protect.

Study Guide BookCaps Study Guides Staff 2012-08-06 The perfect companion to Barbara Kingsolver's' "The Bean Trees," this study guide contains a chapter by chapter analysis of the book, a summary of the plot, and a guide to major characters and themes. BookCap Study Guides do not contain text from the actual book, and are not meant to be purchased as alternatives to reading the book. We all need refreshers every now and then. Whether you are a student trying to cram for that big final, or someone just trying to understand a book more, BookCaps can help. We are a small, but growing company, and are adding titles every month.
