[America's Favorite Homes Robert Schweitzer 1990 During the first four decades of the twentieth century, prefabricated and catalogue homes grew in popularity and number. Built and occupied by farmers, merchants, the new armies of factory workers and other lower- and middle-class families, these are the modest homes that today line American streets. Using mail-order house catalogues from the time, Robert Schweitzer and Michael W. R. Davis chart the development of catalogue houses and their variations and include floor plans for many models. Students of architecture, whether amateur or professional, preservationists and academics will find in America's Favorite Homes a handy reference to those homes that soon will be eligible for historic designation.](#)

[Memory Dmitri Nikulin 2015-07-30 In recent decades, memory has become one of the major concepts and a dominant topic in philosophy, sociology, politics, history, science, cultural studies, literary theory, and the discussions of trauma and the Holocaust. In contemporary debates, the concept of memory is often used rather broadly and thus not always unambiguously. For this reason, the clarification of the range of the historical meaning of the concept of memory is a very important and urgent task. This volume shows how the concept of memory has been used and appropriated in different historical circumstances and how it has changed throughout the history of philosophy. In ancient philosophy, memory was considered a repository of sensible and mental impressions and was complemented by recollection--the process of recovering the content of past thoughts and perceptions. Such an understanding of memory led to the development both of mnemotechnics and the attempts to locate memory within the structure of cognitive faculties. In contemporary philosophical and historical debates, memory frequently](#)

substitutes for reason by becoming a predominant capacity to which one refers when one wants to explain not only the personal identity but also a historical, political, or social phenomenon. In contemporary interpretation, it is memory, and not reason, that acts in and through human actions and history, which is a critical reaction to the overly rationalized and simplified concept of reason in the Enlightenment. Moreover, in modernity memory has taken on one of the most distinctive features of reason: it is thought of as capable not only of recollecting past events and meanings, but also itself. In this respect, the volume can be also taken as a reflective philosophical attempt by memory to recall itself, its functioning and transformations throughout its own history.
